SUMMARY

Senior product manager and builder with 4+ years delivering AI and digital products across B2C and B2B platforms.. Experienced in managing cross functional teams across engineering, design, data, and GTM, with a strong track record of coordinating complex initiatives from scoping through to delivery and adoption. Shipped production AI applications including LLM powered agents and automated pipelines, while consistently tying execution to measurable business outcomes.

EXPERIENCE

Maqsad (Pvt.) Ltd. (Pakistan's #1 ed-tech platform – 4M+ users, \$4.9M raised)

Product Lead

August 2025 – Present

- Built a three agent AI pipeline connecting paid acquisition to conversion: a sales agent handling 1,000+ daily student conversations, a real time lead classifier scoring intent from Meta and Google campaigns, and a campaign optimiser feeding conversion signals back to ad spend. Qualified lead rate improved from 30% to 85%+, and conversion from 2% to 10%.
- Closed Maqsad's first major enterprise deal: PKR 1M/month recurring with Jazz, Pakistan's largest telecom. Owned the integration end to end, bringing doubt solving, video lectures and assessments into their platform, and served as primary stakeholder contact.
- Launched O Level stream from 0 to 350 enrolled students in 3 months at 2x ARPU vs the existing product. Owned setup end to end across web, mobile, lead generation, and conversion.
- Expanded scope to directly manage engineering and design teams across multiple concurrent product workstreams.
- Rebuilt maqsad.io independently using Claude Code, replacing the legacy Webflow site improving Lighthouse score from 60 to 92.
- Took ownership of technical SEO across the site, driving organic traffic and CTA clicks up 2x, with search impressions reaching 2M/month at a 5% CTR and lifted website sign ups by 40%.
- Expanded scope to directly manage engineering and design teams across multiple concurrent product workstreams.

Senior Product Manager

August 2024 – July 2025

- Designed and deployed an LLM powered student counsellor (OpenAI API) from 0 to 1, coordinating engineering, ops, and GTM teams to deliver on time. The counsellor handled 500+ daily leads and reduced manual chat handling by 95%.
- Implemented full CRM workflow (Chatwoot + Typebot) categorising 1,500+ daily leads. Improved tracking accuracy by 85%, increased lead response efficiency by 40%, and conversion by 20%.
- Launched all in one guided after school journey, tripling weekly retention to 75%+, improving cross feature usage by 30%, and generating PKR 2.4M+ revenue via cohort analysis.
- Spearheaded GTM efforts driving 94% YoY growth in B2C conversions with ~PKR 15M revenue impact through revamped acquisition funnels and lead targeting.

Product Manager

January 2023 – July 2024

- Launched timed mock tests feature replacing Google Forms, increasing student retention by 50%+ and creating a key acquisition tool for high quality leads.
- Revamped user onboarding by replacing OTP with password based login, cutting SMS costs by ~70% and reducing support queries in low signal areas by 90%.
- Integrated 1-Link payment gateway, reducing payment failure rates by 50% and directly improving in-app transaction trust.

Associate Product Manager

November 2021 – December 2022

- Developed LLM powered personal statement writing tool with personalised feedback, adopted by 85% of applicants
- Collaborated with engineering, design, data, and academics to ship video lecture feature, enabling 40+ lectures per student weekly

Reckitt

Product Trainee

January 2023 – June 2023

- Conducted deep dive analysis of Dettol's winter soaps category, combining competitor analysis and user research to develop GTM and product enhancement strategy.
- Gathered customer insights via surveys, interviews, and focus groups across seasonal consumption patterns.

PERSONAL PROJECT

Fountain (Pakistani industrial water pump business)

- Built an e-commerce website from scratch using Claude Code for a traditional 30 year old family run business, with a full product catalogue of 30+ line items, to establish an online presence and build B2B buyer trust
- Implemented technical SEO, driving 2.5K+ impressions and a 4% CTR within the first month of launch.

EDUCATION

Bachelor of Business Administration, Major in Data Analytics

Institute of Business Administration (IBA Karachi)

CGPA: 3.7/4.0 | Dean's Honor List (all semesters)

SKILLS

- **AI & Development:** Claude Code, Cursor, LLM Integration, OpenAI API, Agent Development, Prompt Engineering, AI Workflows, Generative AI, Lovable, Replit
